

YOUR TRUSTED PARTNER

Let Us Help You Be DCAA Compliant:

- Maintain DCAA Contract Compliance
- Increase Productivity Across The Entire Organization
- Streamline Your Contract Reporting

N'ware Technologies single integrated solution is designed to manage all core functions of operations, which provides capability to manage government contracts within the system.

CORE FUNCTIONALITIES:

At N'ware Technologies, we meet DCAA audit criteria in combination with all industry specific capabilities that government contracts need. By choosing N'ware as an ERP software, you will help improve cash flow, increase revenue as well as reducing audit issues with transaction backup.

N'ware Technologies

(800) 270-9420

The right ERP solution will be good for your business, but also support the strict rules that come with working with the government, including the following:

- Scope of work: Outline the scope of work for the government contract that includes a detailed breakdown of all activities. Each step or project phase can be defined, as well as each job or activity performed in each phase
- Estimate direct and indirect costs: Direct costs may include labor and materials, and connect activities performed in the scope of work. We are able to manage multiple budgets real-time, within a robust ERP solution and respond faster to deviations in order to control spending
- Control Billing: Billing processes need to be clear and consistent for transparency in cases of government contracts

With specialized functionality designed to manage the specific requirements of your contracts allowing you to:

- Manage cost plus, time, materials and fixed price contracts
- Identify costs by contract line items
- Track and segregate direct and indirect costs
- Manage indirect cost pools
- Allocate indirect costs in different cost objectives
- Track labor, timesheets and expenses
- Invoice according to the contract
- Access real time dashboards of projects at any stage

"Since N'ware Technologies implemented SAP Business One, we now have a single solution for our entire operation, allowing us to operate more efficiently with greater visibility across the company."

- Michael Johnson PTC
