The WMS Center of Expertise for SAP Business One

Our WMS Center of Expertise for SAP Business One brings together a multidisciplinary team of renowned professionals, along with an unparalleled offering of innovative technological solutions to drive the productivity and profitability of the most ambitious SMBs.

While most providers limit themselves to offering a single solution—the one that benefits them the most—our team will help you select, implement, and optimize the solution that best meets your specific needs. N'ware is the only SAP Certified Business One Partner to locally offer and deploy **three WMS solutions**: LISA WMS, Produmex, and Infios.

30 years
of experience

The only partner
offering 3 SAP Business
One-certified **warehouse**
management solutions

AutoStore

AutoStore is a modular storage and retrieval system that uses a grid structure to store bins containing products. Robots navigate the grid to retrieve and transport these bins to picking stations.

ALREADY DEPLOYED WITH SAP BUSINESS ONE!

Collaborative robots

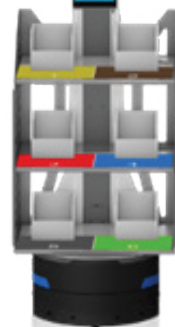

**Affordable and easy to deploy,
without disrupting your operations**

Robots as a Service (RaaS) enable SMBs to access collaborative and autonomous robots at a very low cost, minimizing upfront expenses related to purchase and maintenance. An innovative technology ready to be deployed in your distribution center.

**ADAPTS

IN A FEW
WEEKS**

**AFFORDABLE
FOR ALL
SMBs**

AFFORDABLE FOR SMBs AVAILABLE FOR RENT

Vertical Lift Module (VLM)

A vertical lift module (VLM) is an automated storage system consisting of two columns with bins or shelves stored vertically. The VLM retrieves items using an automated lifting mechanism that brings the desired bin to the operator.
